

N E W ! s e e T O U C H™ K E Y P A D S

The new seeTouch™ Keypads feature large, easy-to-use buttons, plus a unique backlit engraving option that makes the Keypads readable any time of the day or night. seeTouch buttons are rounded, allowing engraving to be displayed at an upward angle, increasing readability. seeTouch Keypads are available with one to seven buttons, allowing you to customize the number of functions to fit your need. The flexible design even allows the number of buttons and the configuration of the buttons to be changed after the Keypad is installed.

Other options include configurations with infrared receiver, raise/lower buttons, and inserts which allow seeTouch keypads to match Designer-style devices in your home.
