Visor Control Transmitter

HR-VCTX-SW

6 V^{DC}, 35 mA

Overview

The HR-VCTX-SW Visor Control Transmitter is for use with *HomeWorks* systems in conjunction with the Visor Control Receiver (HR-VCRX-SW), and allows the activation of home lighting scenes, garage doors, or gates from the car.

Up to ten (10) Visor Control Transmitters may be used with each Visor Control Receiver.

Important Notes

Batteries: (2) 3 Volt Lithium coin cell (#CR2032).

Batteries are included and pre-installed. Battery lifetime is approximately 10 years.

Environment: Meets the temperature standards set by the Society of Automotive Engineers (SAE): -40°C (-40°F) to 113°C (235°F).

Finish: Do not paint the Visor Control Transmitter.

Cleaning: To clean, wipe with a clean damp cloth. **DO NOT** use any chemical cleaning solutions.

Transmitter to Receiver Range: Approximately 150 feet (46 m). The performance of the Visor Control Transmitter with the Visor Control Receiver is highly dependent upon a variety of complex factors such as:

- Distance
- Construction of walls
- Electrical equipment nearby

System Control: The Visor Control Receiver must learn a Visor Control Transmitter in order for the Transmitter to operate the system. See the Installation Instructions provided with the Visor Control Receiver.

FCC Information

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by Lutron Electronics Co. could void the user's authority to operate this equipment.
