

LAMP DIMMERS

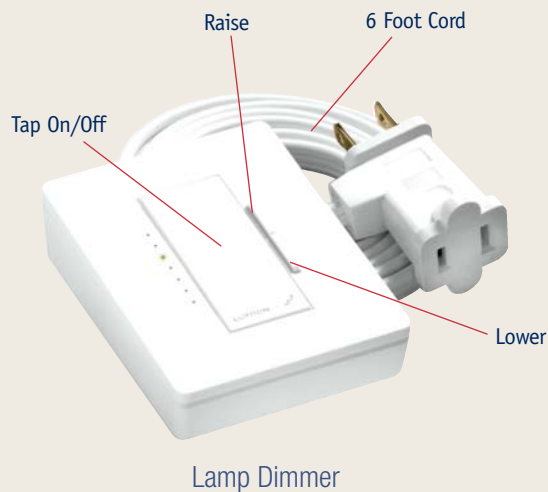

Lamp dimmers allow table and floor lamps to be included in the *HomeWorks* lighting control system. Each lamp dimmer controls one table or floor lamp with simple and intuitive buttons for on/off and raise/lower.

The built-in intelligence allows each lamp dimmer to be controlled from any *HomeWorks* keypad in the home, as well as from touchscreens, universal remotes and other home automation controls.

Lamp dimmers are suitable for any home and can be added to a HomeWorks system at any time.

LAMP DIMMERS

FEATURES

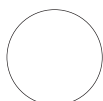

- Allows local dimming and on/off control of one lamp
- Light fades up or down when tapped on or off
- Double-tap brings light instantly to full on
- Press-and-hold initiates long fade to off
- Green status lights indicate current light level
- Simple to install and can be relocated at any time
