

## GRAFIK EYE® PRESET LIGHTING CONTROLS

GRAFIK Eye Preset Lighting Controls add drama to any room by allowing you to instantly recall a preset lighting scene perfectly suited for the moment. They are ideal for rooms or areas with multiple lighting zones that often need to be adjusted for changing activities, such as dining rooms, living rooms, and home theaters. GRAFIK Eye Controls take the place of two to six switches, simplifying control, while adding flexibility. An infrared receiver is built-in for hand-held control of your lighting.

GRAFIK Eye units can also be controlled from HomeWorks Interactive Keypads, as well as from touchscreens, universal remotes, and other home automation controls.

DESIGN NOTES:
