K E Y P A D S

Slim-Button Keypads provide the ability to control and monitor lighting, audio, video, and other home systems, in a single room and throughout your home. Each Keypad button may be programmed to control an individual lighting zone, any group of lighting zones, or a lighting scene for your entire home and landscape. By taking the place of several switches, Slim-Button Keypads minimize wall space, while maximizing the number of functions possible.

Keypads are often used in high-traffic areas, where convenient control of many lights is needed, but the design elegance of a single Keypad is desired. Slim-Button Keypads can be custom-engraved below each button with names of your choosing at no additional cost.
