K E Y P A D S

Large-Button Keypads provide the ability to control and monitor lighting, audio, video, and other home systems, in a single room and throughout your home. Each Keypad button may be programmed to control an individual lighting zone, any group of lighting zones, or a lighting scene for your entire home and landscape. By taking the place of several switches, Keypads minimize wall space, while maximizing the number of functions possible.

Keypads are often used in high-traffic areas, where convenient control of many lights is needed, but the design elegance of a single Keypad is desired. The design of this Keypad features large, easy-to-read buttons, which can be custom-engraved either on or below each button with names of your choosing at no additional cost.
