

T W O - B U T T O N K E Y P A D

Two-Button Keypads provide the ability to control and monitor lighting, audio, video, and other home systems, both in a single room and throughout your home and landscape. Each Keypad button may be set up to control an individual lighting zone, any group of lighting zones, or a lighting scene.

Two-Button Keypads, which feature two large, easy-to-find buttons with prominent status indicator LEDs, are typically used where simple or specialized control is desired. Examples of some applications include: toggling lights on and off in rooms with only one or two zones of lights; raising and lowering a light without affecting other lighting in the room; and enabling or disabling a panic mode. Two-Button Keypads can be custom-engraved with names of your choosing at no additional cost.
